

Art Lesson

L.O. I can increase my knowledge of colour theory and create a collage using recycled materials.

Set a timer for 1 minute

You have 1 minute to name as
many different colours as you can.

3, 2, 1, *GO!*

How many colours did you come up with?

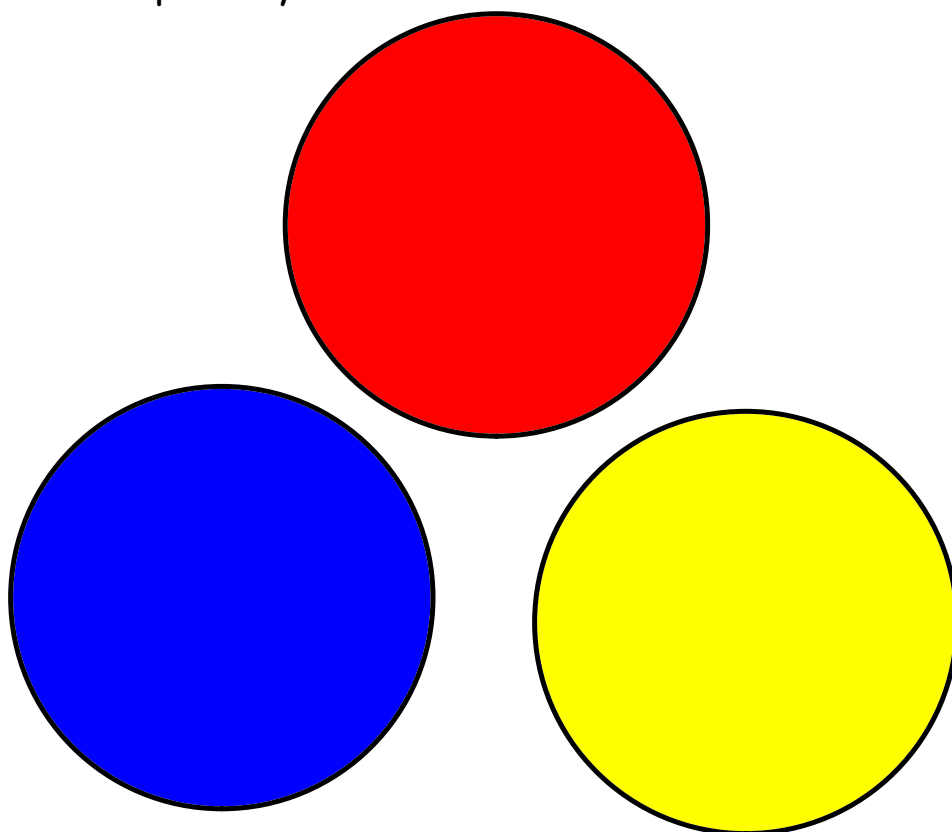

Did you know there are over 10 million different colours identified?

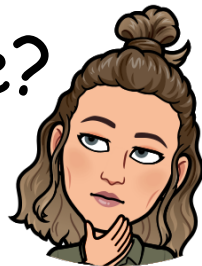

To help us understand colours better, we organise them into different groups. This helps us to chose different colours that compliment eachother when we are creating works of art.

Do you know what the 3 primary colours are?

These are our primary colours!

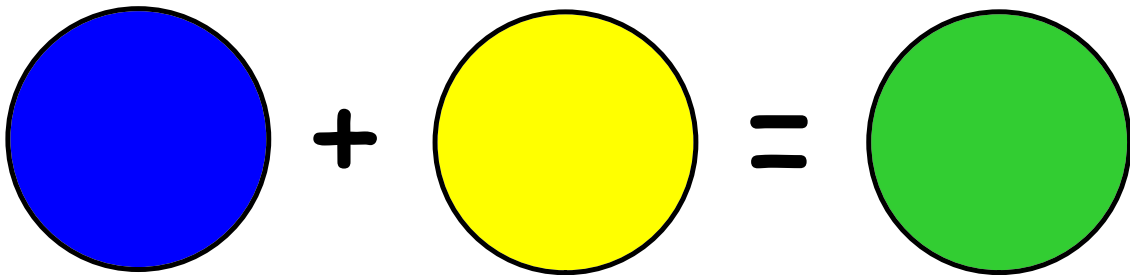

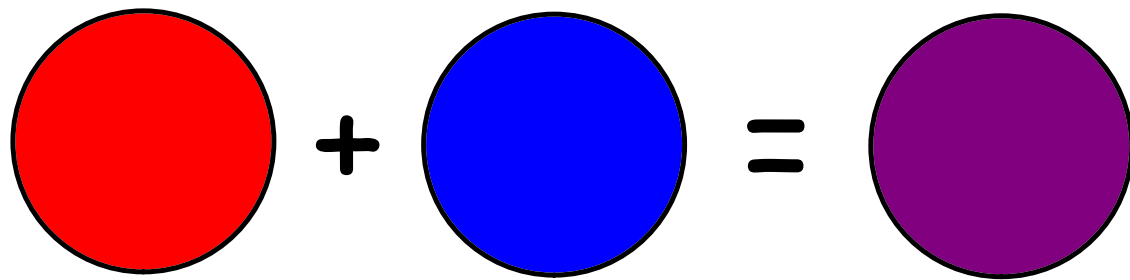

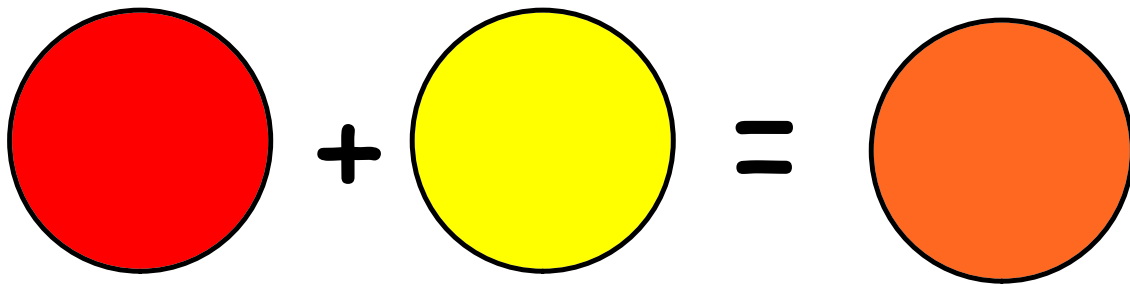

Do you know what the secondary colours are?

Clue: you can make
them by mixing
primary colours

Here are the secondary colours!

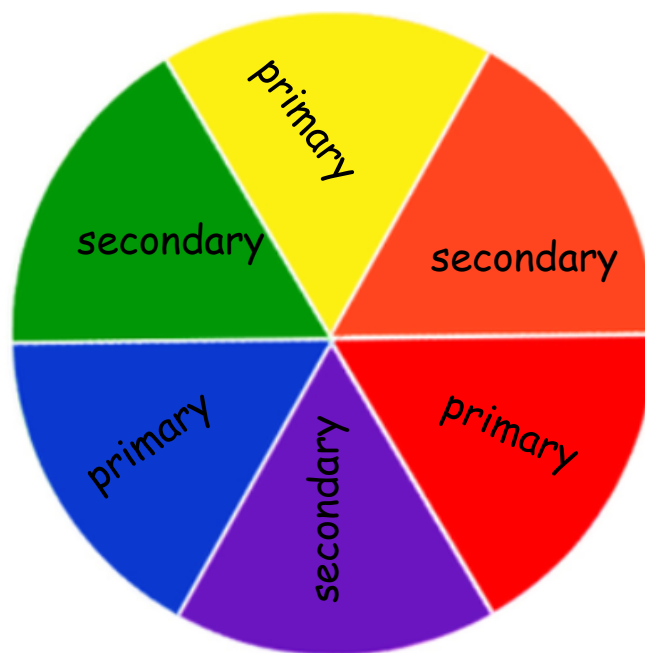

Can you point to the secondary and primary colours on the colour wheel?

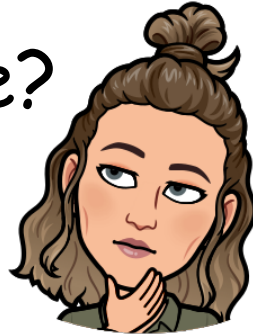

Did you choose the correct colours?

What do you notice about the secondary colours?

Finally, we have tertiary colours.

Can you guess what the tertiary colours might be?

Primary Colours

Secondary Colours

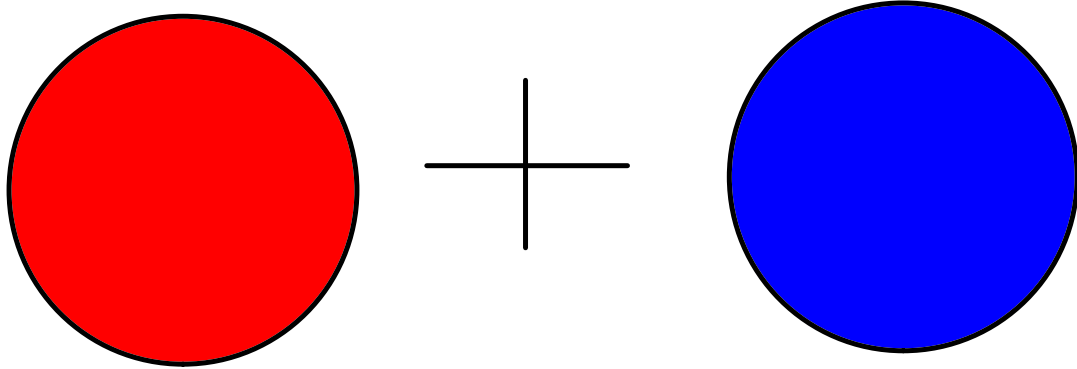

Tertiary Colours

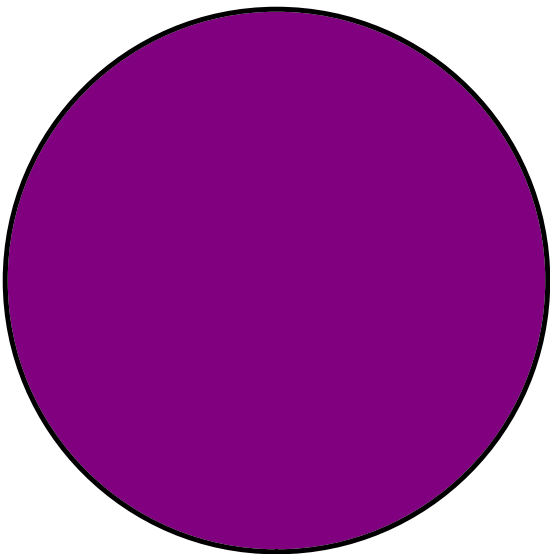

Here you can see how we mix colours together to create new colours.

Quiz time!

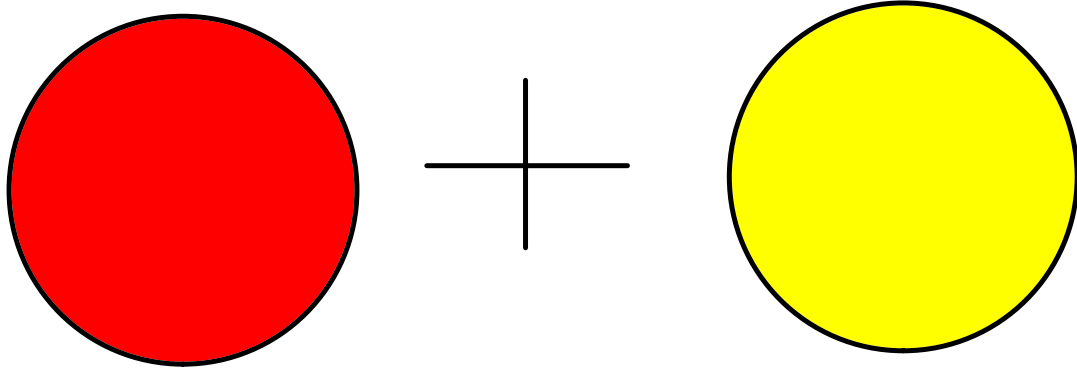

What colour will be made?

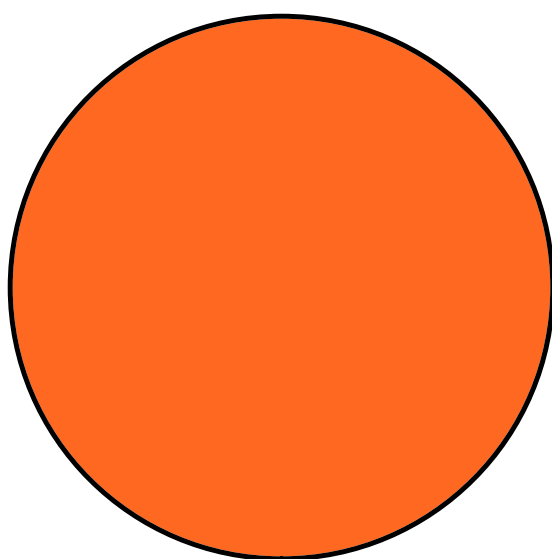

The answer is...

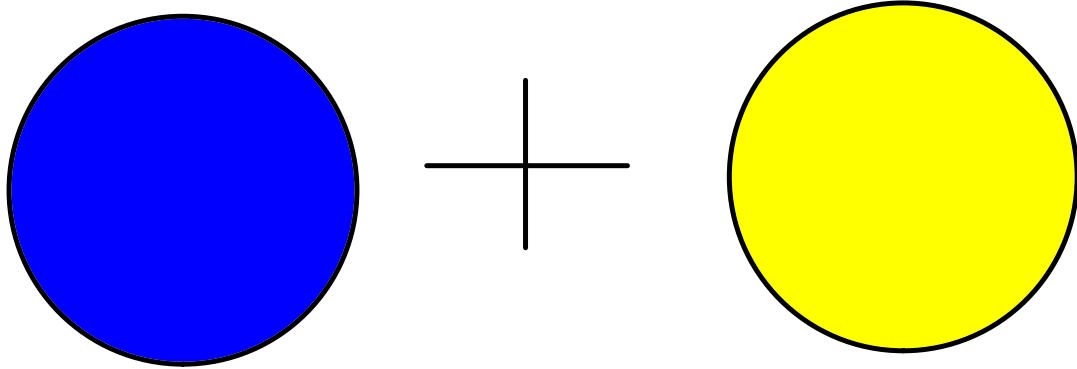

What colour will be made?

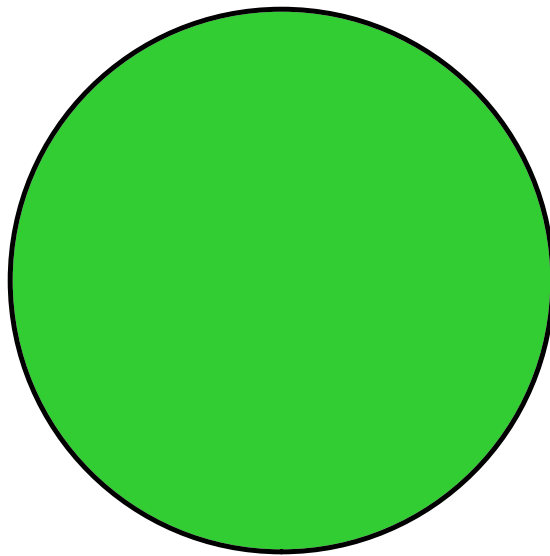

The answer is...

What colour will be made?

The answer is...

This term our art focus is collage.

Do you know what a collage is?

A collage is...

a piece of art made by sticking various different materials such as photographs and pieces of paper or fabric on to a backing.

Here are some examples of collage:

Your independent task this week is to make your own collage!

Interestingly, to create art we don't always need art supplies.

For this project you will need:

- A piece of paper or cardboard as your base
(this could be the side of a cereal box)
- A pencil
- Some recycled materials such as magazines,
crisp packets, sweet packets, cereal boxes
etc.
- Some glue (don't worry if you do not have
any you can still complete the task)
- Scissors

Your task:

I would like you to choose a colour and create a collage of a fish using this colour.

You can use crisp packets, cereal boxes and other recycled materials. Cut them into small shapes and arrange them on your base to create the shape of a fish.

Using your knowledge of colours, use 2 colours that blend together nicely.

Here is an example of a collage using colours that compliment each other:

Don't forget to send in photos
of your work to your class
teacher!
