

Tuesday

I can match numeral to quantity correctly.

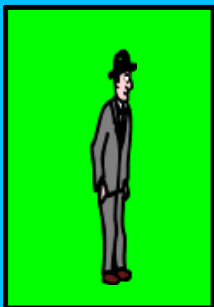

Lets count...

What number can you see on the train carriage?

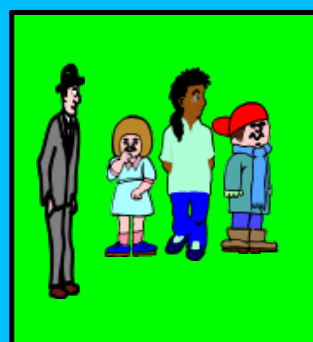

Can you match the number on the train to the correct number of people?

What number can you see on the train carriage?

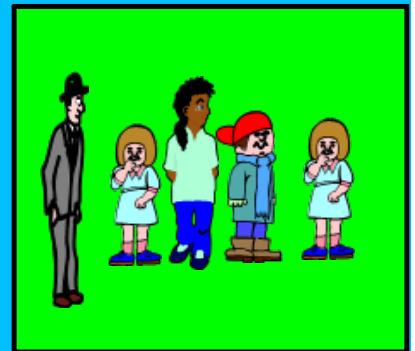

Can you match the number on the train to the correct number of people?

What number can you see on the train carriage?

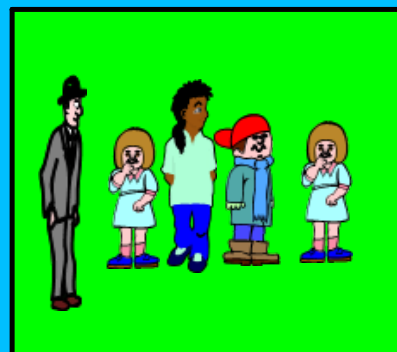

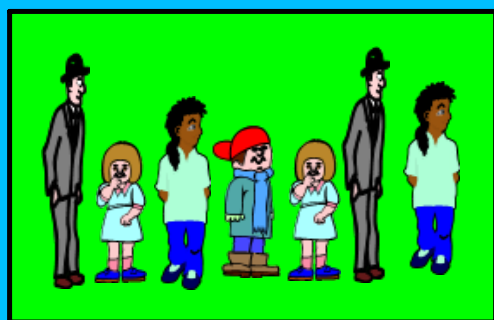

Can you match the number on the train to the correct number of people?

What number can you see on the train carriage?

Can you match the number on the train to the correct number of people?

Home learning:

Write some numbers on some paper and find some objects in your house. They could be toys or things like pasta, spoons, cereal whatever you can find. The children are then to match the number to an amount just like we have been doing in the slides. Please send photo evidence through evidence me.
